Career Guidance and Placement Cell

Vocational Guidance and Placement Cell has been set up at Women's College Georai. This cell is working under the guidance of Dr. Kanchan Parlikar, the principal of the college. The students visiting the department are continuously informed about the opportunities according to their interests and the required educational qualifications and skills. Every year many students go to various universities of Maharashtra under the guidance of this cell and the necessary information is provided by the cell as well as by the professor of the relevant subject in the college. Students in the college are made aware of the service opportunities available to them and the skills required for it through various means. The preparation of the students is done by guiding them in the context of competitive exams on various subjects in the college. Also, the principal of the college. Dr. Kanchan Parlikar, gives guidance and encouragement from time to time

In order for the students to prepare for the various competitive examinations conducted by the Government of India as well as the Government of Maharashtra as well as the Bank for the recruitment of various posts and to get comprehensive information, the chief guests are invited to the college under different schemes and guided by the professors of the college. Regularly published advertisements are also displayed on the notice board in the college library. Also, from time to time the students are guided and sent to those places where job opportunities are available

The lectures of the professors in the college and outside the college on business-oriented guidance were conducted as follows

Guidance for competitive examination and career counseling
